CEO MESSAGE

We take pride in being one of the pioneer company dealing with Construction, Engineering & Building materials in Baghdad, Iraq having achieved remarkable growth over this years and contributing significantly to the development of the country.

“We have a client first philosophy.”

We have only one objective: to ensure our clients mission objectives are achieved with the highest level of capability and assurance. SWCO's clients come to us with confidence that we have the expertise to take service delivery to the next level of performance.

“We live out our values.”

The SWCO Company has attained prominence as a leader in the field of construction, engineering & building materials through competence, competitiveness and timely delivery with highest quality standards and recognized safety performance.

SWCO's culture is defined by a simple set of corporate values that define how we operate every single day – Trust, Care, Innovation, and Pride. They reflect how we interact and valued our clients, our colleagues, and our communities to their complete satisfaction through efficient management and excellent workmanship, which we continue to maintain with our untiring efforts. We hold each other accountable for creating a company we can all be proud to work at.

I hope this provides you with a few reasons to get to know SWCO better. Whether you are a potential customer, a small business partner, or a future employee, we look forward to finding out how we can work together to bring service to life.

Thank you for your continued support and cooperation.

AL SELM & AL WE'AM GENERAL CONTRACTING CO. LTD.

ABOUT US!

Our passion for engineering and continuous improvement of our processes are client centered. Since our humble beginnings in 2004, we have been working in close cooperation with our clients all over the world and providing them a variety of leading industry solutions and innovations.

SWCO, has been the go to engineering firm, specializing in all types of EPCC gas and oil projects (engineering, procurement, construction, and commissioning) along side our extensive experience in camp services.

Research, design, management, technical consulting are all specializes that have helped us shape our services into true partnerships.

Our extensive knowledge in the industrial, residential, electrical, commercial, and mechanical fields has made us a true one stop and complete solution provider to all those who have kindly trusted us with the execution of their project and healthy development of their business plans.

At SWCO, we praise ourselves for being your true partner in the gas and oil industry. The activities of today that we are engaged in, prepare us and our clients for a better, more efficient, and more productive tomorrow. Delivering success to our clients by combining in depth knowledge of this field with the most innovative technologies, is at the core of our values. We invite you to view our profile to learn more about our complete and custom services and look forward to meeting with you and your teams to assist in developing the best solutions for your business.

Al Selm & Al We'am General Contracting Co. It is engaged in Iraqi projects and oil fields since 2004. Registration number: 213067. We have experience in such projects:

- » EPCC Projects.
- » Civil Works & Camps.
- » Power & Energy.
- » Construction and Contracting.
- » Piping & Tanks & welding.
- » General Trading for Engineering Equipment
- » Pumping and water plants.
- » Waste water treatment plants.
- » Industrial and commercial building services.
- » Power transmission and distribution networks.
- » Fire protection and alarm system.
- » Mechanical ventilation and Air conditioning system.

With its experience as well as its administrative and technical team, the company successfully implements all kinds of training, design, management and engineering projects and provides technical consulting on them.

Over the years, SWCO owes its success to its employees' excellent performance, customer service that exceeds expectations, and a safety program that has resulted in zero accidents. From day one, honesty and open communication have strengthened SWCO employees, and it shows in our work. SWCO's core professional staff has the experience and combination of skills needed to find the best solutions for each technical challenge. SWCO employs a team of dedicated and experienced engineers, project managers, laborers, after-sales service personnel and administrative support personnel. All our projects are professionally managed at every stage of their implementation, thanks to the vast experience of our team.

Our Mission

“To provide our clients with high quality project management, design, execution and consulting services.”

“To develop effective management that focuses on performance, continuous organizational development and instilling a work ethic in all personnel.”

Our Vision

“ SWCO continues to move forward to become a leading engineering and construction firm, both in Iraq and around the world, with projects that consistently meet international standards. ”

“ Our vision is to guide every aspect of our business, defining what we must achieve to continue to ensure sustainable, quality development. ”

Our Values

“ Ownership: We have a strong sense of responsibility and accountability for our thoughts, feelings, words and actions; responsibility for the choices we make and the results that follow; respect for the opportunities granted to us and a willingness to go the extra mile in pursuing them. ”

“ Innovation: Innovation has always been at the heart of our organization. From the first days till today, innovative ideas have taken us to new places, new concepts and new people. We believe in pursuing novel ideas, starting a conversation that has never been held or taking a new approach to an old task; anything new is innovative. ”

“ Passion: The continual growth of our organization is deeply linked to the passion that has been developed towards the organization itself and its business partners. We believe in passionate enthusiasm, desire and motivated attitude, strong determination, and a compelling feeling of appreciation. ”

“ Integrity: Adherence to moral and ethical principles and soundness of moral character are core to our organization. We have always built on trust and honesty towards our people and business partners. ”

HEALTH & SAFETY

SWCO is committed to ensuring that our operations are conducted with minimal harm to humans and the environment, and that the quality of our products and services is always appropriate and maintained. We strive to continually improve the HSE working and living conditions of our employees, as well as the health and safety of the work environment.

The company has formulated a safety policy for all employees as follows:

- » Enhance and create work safety
- » Prepare work method statement and accident prevention method
- » Set programs to control all high risk activities

We believe that maintaining high standards of safety is critical to the success of all projects. All projects are underpinned by our security management plan, which contains a series of policies, guidelines and operating procedures for our tradesman. The plan was developed with industry best practices in mind. As a result of our contribution to safety, we ensure compliance with relevant legislation in this area, but most importantly, we provide a safe working environment for our employees, subcontractors and customers. Every effort is made to ensure that safety is a basic minimum standard set before every project. This culture is transmitted from top to bottom as a lifestyle to ensure the well-being of our employees, partners, customers, communities and various stakeholders accordingly.

MANAGEMENT SYSTEM CERTIFICATE

Regd. Off: TNV House, 337-B/187-B, Amber Vihar, Lucknow-20 UP, Mail: info@tnvgroup.org

Terms and Conditions:

1. Validity of this certificate is subject to the organization maintaining its system in accordance with respective Management System Standards along with TNV's requirements.
2. This certificate remains the property of TNV System - Certification P Ltd., to whom it must be returned upon request.
3. Use of Logo must be in accordance with the requirement of the TNV and Accreditation board (if any) failure to meet the requirement shall be held liable for action.
4. This certificate is not final evidence of certification status; status must be verified with current status as given in TNV's official website i.e. www.tnvgroup.org or writer to tnvceo@gmail.com or info@tnvgroup.org

ENVIRONMENTAL

The many years of SWCO's business success depends on our ability to continually improve the quality of our services while protecting people and minimizing our impact on the environment:

- » Pollution prevention.
- » The efficient use of natural resources.
- » The reduction and recycling of waste.

There are intensive efforts to ensure sustainable development in terms of environmental management at both the local and national levels. We care about the environment, so we work to minimize the impact of our activities on the environment through the sustainable development policies that guide our work. Our experience has proven that sustainable business practices can be cost-effective, increase employee and customer loyalty, and ensure the stability of the company's business. SWCO is committed to conducting its activities without harming the environment. The goal of our activities is to conserve natural resources and minimize waste by reducing and recycling. We handle and dispose of waste in a safe, environmentally responsible manner, encourage energy efficiency and the use of renewable energy, and encourage our business partners and suppliers to strive for the same high level of environmental conservation.

The activities undertaken comply with all applicable environmental laws and regulations and meet the Owner's environmental standards and requirements. Cutting down and damage to trees and vegetation shall be kept to a minimum and the area of construction sites shall be limited. Damaged site should be restored as soon as possible. Waste materials and discharged wastewater shall be disposed of in a designated area. Effective measures shall be taken to avoid natural gas leaks or other pipeline emergencies. An environmental management system (EMS) must be implemented during construction to minimize environmental risk and impact as much as possible.

QUALITY MANAGEMENT

We meet and exceed international standards in our company's operations, which is the primary expectation

of our clients. Our inspiration for this is that we are on the same side as our customers with the ultimate goal of finding solutions to complex issues, regardless of profitability. SWCO's goal is to become and remain a market leader in the quality of its products and services through the implementation and Integrated Quality

Management System:

- » Perfection unique achievements in executing the project for all parties.
- » Create an experience house for all domains to be the first choice for carrying out the engineering projects.
- » Presenting all unique consultancy services according to international standards.
- » Create a consortium with global consultancy offices.
- » Create a consultancy team who has professional qualifications in all domains widely spread in executing the local engineering projects to link us with global projects.
- » Sustainable development of the physical and Human resources.
- » Infrastructural development work's environment improvement.

Quality assurance and quality control covers all trading and contracting activities from conception, development, construction, production, installation, servicing and documentation. It includes the regularization of raw-materials, assemblies, products and components, service related construction and management, inspection process. Quality assurance and quality control are integral components by which we function. Being awarded ISO 9001:2015 the highest accolade in our field of expertise.

PROJECT MANAGEMENT

Through our established project management system we are able to deliver projects on behalf of our clients in accordance with agreed project milestones, key deliverables and project budgets. We also maintain a thorough testing and internal quality audit regime that ensures all our installations comply with relevant project specifications, requirements and standards. In order to deliver value, it is imperative to deliver certainty. That is why at SWCO we analyze every project to the slightest detail in order to detect and solve any possible inconvenience. We understand that as long as we want to achieve excellence, first we must assume our share of responsibility for the project. For that purpose we develop a project evaluation, one at a time, which improves it and therefore assures the quality process. All our projects are led by a highly experienced Director and a team with a passion for delivering high quality commercial engineering solutions alongside an excellent level of service.

BUSINESS STRATEGY

Our Scope of Work

- » EPC Projects
- » Power & Energy
- » Construction and Contracting
- » Piping & Tanks & welding
- » General Trading for Engineering Equipment
- » Waste water treatment plants
- » Industrial and commercial building services
- » Power transmission and distribution networks
- » Fire protection and alarm system
- » Mechanical ventilation system
- » Plumbing, sanitation and water plants

We are a professional services business whose purpose is not just to add capability but also to build it in our clients. Our impact comes from our understanding of customers. We create indepth customer insight and use this to build campaigns that resonate with what they are looking for.

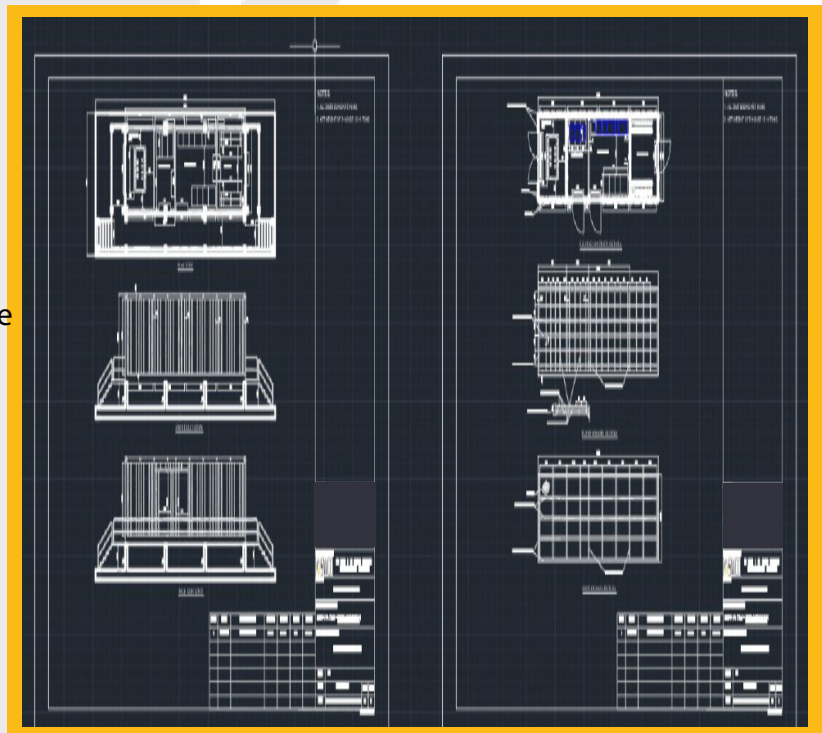

CIVIL

SWCO, provides a broad spectrum of engineering services associated with public infrastructure and private development projects. The firm's civil engineering disciplines have proven invaluable to clients on transportation, water resource, municipal infrastructure, land development and site design projects. SWCO's civil engineers have extensive experience with the design and preparation of plans, specifications and estimates for city, county, state and federal infrastructure projects. Our civil engineering services include planning, feasibility studies, assessment, design and construction for a broad range of projects.

SWCO, has a separate division for Construction of steel structure with highly professional staff and skilled labor force that erecting steel structures, Equipment and Piping for various projects in Oil & Gas, Power & Destination, Petrochemical and commercial sectors. We have executed erection Contracts for the most architectural and complicated type. We have specialized labor force for carrying out Fire Proofing and Intumescent Painting. Careful material segregation, well documented welding procedures, renewal of welder certifications, and calibration of equipment ensures the project quality we are proud of. SWCO, offers a complete steel construction solution ranging from detailing to on-site erection along with maintenance and after sales services, all under one roof.

Industrial Civil Engineering Services include:

- » Engineering, Design
- » Process Plant Infrastructure
- » Process Plant Structures
- » Bulk Fuel Storage Facilities
- » Effluent Water Systems
- » Ash/Waste Disposal Infrastructure
- » Materials Handling Structures
- » Workshops and Warehouses
- » Electrical and Control Buildings
- » Administration Buildings

MECHANICAL

We in SWCO, have qualified and experienced team who can carry out the engineering missions in professional way and as per our clients requirements. We do the Installation of (pumps, tanks, pipelines, pressure vessels, heat exchangers, towers, compressors, etc with the required steel structures including alignment, straightness, calibration and balancing through specialized staff who has good experience in these fields the working procedures are prepares to comply the international code and standards.

- » Installation of Rotating Equipment (Gas Turbine Generator, Compressor, Pumps, Electrical Cranes, Chemical Injection Units, TEG Refrigeration Package)
- » Installation of Stationary Equipment (Vessels, Drums, Columns, Heat Exchangers, Filters)
- » Fabrication and Installation of Storage Tanks
- » Installation of Firefighting Systems
- » Specialized of Hot Tapping
- » Cathodic Protection Services
- » Insulation of Stationary Equipment, Pipeline and Piping Systems
- » Hydrostatic Testing and Cleaning Services
- » Chemical Cleaning for Process and Stationary Systems
- » NDT Services

Backed by experienced personnel with expertise in design procurement, project management and with our extensive range of equipment and experienced site personnel we have the capability and capacity of delivering innovative and complex site based projects including new installations, repairs and maintenance as well as shut down works. These works are complemented and supported by our fabrication workshops. We provide highly experienced team with qualified workers and certified welders. SWCO has a strong focus on working safely, maintaining ongoing training in safe work practices and a proactive approach to environmental management and risk management.

- » Manufacturing Services - Steel Fabrication - Structural, Plate & Pipe works.
- » Site Construction and Installation Services.
- » Green and brown-field projects.
- » Field welding.
- » Welding field and fabrication.
- » Experience with most metals.
- » Pipe hangers and supports.
- » Flange bolt-ups.
- » Site installation.

OIL FIELD SERVICES

SWCO is a significant oil and gas service and material provider. We are a team of professionals, civil and mechanical engineers, drill engineers, inspectors, safety advisors, geologists, project surveyors, administrators and specialists. Our company offers a large number of oil and gas services such as, pipeline services, inspection services, maintenance, petrochemical services and supplies, chemical services, civil and electrical services for oil and gas fields, oil wells services, Rig services, catering, oilfields safety, and other services. We offer the full range of integrated services for EPC plants including: project management, process engineering, multi-disciplinary detailed engineering, procurement, construction, commissioning and startup. We also provide maintenance engineering and global service to increase your facilities performances. We are committed to providing each and every customer with reliable, safe and efficient gas handling equipment to help you maximize your productivity. From flow devices and gas delivery systems to regulators, purifiers and filters, we offer a complete line of equipment to help you meet your most demanding and precise applications .

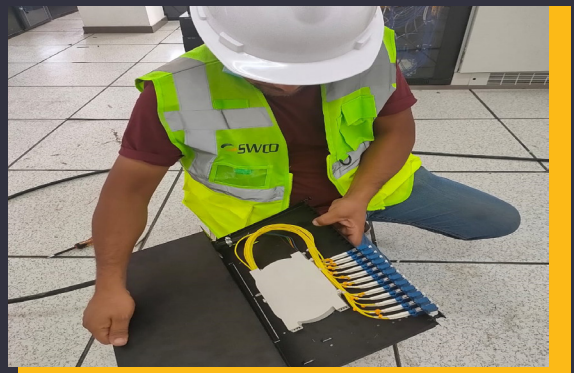

ELECTRICAL

Our expertise has been growing in a number of professional fields. We have years of experience working with electrical SWCO COMPANY 's team of engineers has unmatched industry experience delivering superior work on any project, from simple to complex. SWCO's electrical engineers work with a project team of substation designers, civil engineers and project managers to assist in the design, procurement and construction of LV/HV substations, switchyards, power quality projects, transmission lines and other high voltage production and distribution projects. We have the resources to provide a comprehensive electrical design and installation service for large and complex projects. SWCO's electrical engineering team designs and builds LV/HV projects across the country, specializing in EPC services for oil & gas insulated substations, switchyards and substations and high voltage transmission lines.

- » Installation and Commissioning of Diesel Generator Set
- » Power Transformer (13233/kv,3311/kv,110.4/kv,)
- » Erection of transmission towers
- » Cable stringing / Dummy panel
- » LV Power Distribution Panel
- » LV Switchgear and MCC Panel
- » MV Switchgear Panel
- » NGR and VSD Panel
- » Power Capacitor System, Power Monitoring System , SCADA PMS/ECS

- » Bus duct Systems
- » Power System
- » Installation of Fiber Optic Cables
- » CCTV Systems
- » Communication Systems
- » Grounding System
- » Fire Alarm System
- » Telephone System

EPCC

SWCO, is formed by a team of experienced Professionals in the field of Design, Planning and Project Management with expertise of over 15 years in Industrial Green and Brown Field Projects, right from Concept to Commissioning. As Iraqi Economy is growing, there is an ever increasing need of the experienced professionals to partner in the growth. Moreover an expertise in such a vast field is limited, and those available have their hands full. We at SWCO, are committed to bridge this gap, and act as the extended partners of the Client, by providing most efficient Engineering solutions. By assessing risk implications, the total cost of ownership, time and production constraints, SWCO provides focused engineering, procurement and construction management expertise to deliver cost-effective, sustainable solutions, which are technically sound and aligned with the client's expectations. SWCO is proficient in combining the principles of industrial civil engineering with decades of practical experience. These factors are assimilated with global best-practices and the latest technology, to create world-class, customized client solutions to both the public and private sector clients operating in the Oil & Gas, Chemical, Electrical Power and Industrial & Mining industries.

Our team of engineers are trained to integrate their knowledge and experience through all stages of the design process, from conceptual design to project handover. SWCO offers complete solutions for the Oil & Gas Industries starting from design and detailed engineering to procurement, fabrication, and construction and commissioning of bulk and process plants.

ENGINEERING

SWCO has been providing innovative and quality engineering and design, and project management services for major oil and gas projects. Our work has encompassed a broad range of projects, covering the entire spectrum Onshore Oil & Gas processing systems in the market. Our team of engineering professionals has worked on a wide range of projects. Regardless of scale or complexity, we have developed excellence in capability to support our client's/customers' projects using tried and tested effective tools and systems. SWCO's team of experienced engineers executes complex and challenging projects. The individual and collective project and technical expertise of its engineering experts allows SWCO to deliver appropriate, cost-effective solutions to clients. Our proven, time-tested design and engineering approach is based on a logical sequence of processes that focus on stakeholder input and reducing redesigns that impact cost and schedule. We provide a full range of services including engineering, basic/detail engineering design, drafting and as-built drawings including 3D, Front-end-engineering design, conceptual design/feasibility studies, support during fabrication/installation, startup and commissioning, logistics planning and simulation, project management and engineering consultancy services.

SWCO employs a totally diverse team of dynamic engineers covering all engineering disciplines, together with required computer hardware, software and peripherals. The company's engineering expertise ranges from traditional disciplines, such as civil, electrical, mechanical/facilities, instrumentation, piping, process and structural engineering to advance specialties including simulation, and the use of interactive 2D, 3D modeling for engineering analysis and production of designs.

PROCUREMENT

Over the Years, SWCO provided Equipment and Material Procurement and Supply Services to the oil and gas industry throughout Iraq and the rest of the world. Procurement in the Oil & Gas Industry has become an essential service in today's competitive marketplace. Our role is to find and supply all the manufactured goods associated with the exploration and delivery of oil and gas. Our customers expect an exceptional level of service and we fulfill that expectation by delivering a reliable, honest, diligent and conscientious service that meets their specific demands. The following list provides typical examples of the type of equipment we are asked to supply:

**BETTER
PROCUREMENT
VALUE**

- » Valves, Actuators, Regulators
- » Pumps
- » Hoses and Fluid Handling
- » Hose Fittings
- » Pipe Fittings and Flanges
- » Pipe and Tubular Products
- » Separators and Filters
- » Gauges and Meters
- » Pipeline accessories
- » Generators
- » Cranes and lifting equipment
- » Marine Services
- » Steelworks
- » Safety Equipment
- » Personal Safety Equipment
- » Coatings, resins, paints
- » Compressors
- » Lighting and Electrical Products
- » HVAC Equipment and Supplies
- » Subsea Pipes & Fittings
- » Non Corrosive Fittings
- » Stainless Steel Fittings
- » Stainless Steel Pipes
- » Hazardous Area Electrical Equipment
- » ATEX Equipment

Construction

SWCO, provides construction, project management services using established technologies, systems and work processes to provide most favorable results for clients. By designing a building production system, SWCO is able to reduce waste of materials, time and effort through a “master builder” model that generates value for all parties. Our business is driven by the desire for client satisfaction which has been achieved by focusing on the quality of all aspects of the construction process from general advice on budget costs, planning, procurement, and the design through to the onsite construction and hand over.

Our Project Team includes field engineers covering each aspect of the project and required supervisors and personnel to run the project efficiently. The Project Site team coordinates closely with our head offices and reports project progress and any issues for required solutions as well as financial and commercial

COMMISSIONING

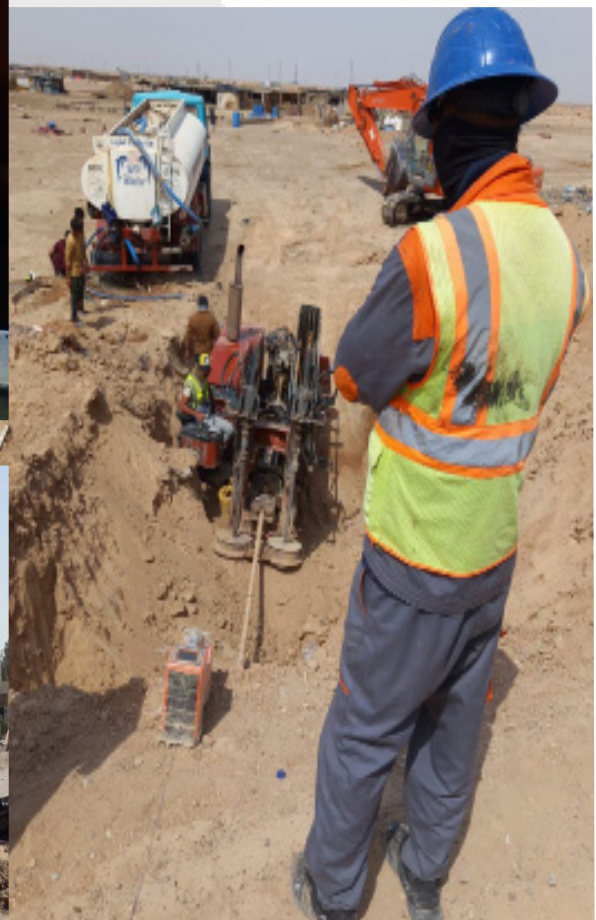

SWCO, provides services for Electrical System Testing including Pre-commissioning, Commissioning & Maintenance. We are dedicated to serve industrial sector, as well as academic and government institutions through awareness of modern scientific and engineering problems applied in Quality and Material testing, Development of leading edge, cost-effective technologies, Optimal selection of new and emerging methods, Efficient and cost saving applications. We improve safety and reliability. We inspect, test, and evaluate our customers' critical assets, reducing liability, and safeguarding their consistent performance. Commissioning services are supported by sophisticated commissioning systems and an extensive database of resources that check, inspect and test every operational component of the asset prior to handover. According to our arrangement, a Warranty Organization will be in place after the completion of commissioning. The Organization will be composed of some members of the commissioning and construction. Maintenance organization is composed of engineering, procurement, construction and operation experts and qualified team.

DRILLING

Drilling Fluids & Drilling Mud Chemicals & Oil Drilling Chemicals

SWCO is a leading supplier of Drilling Fluids, Drilling Muds and Chemicals to Oil and Gas exploration projects in Iraq. We are the suppliers of drilling fluids mud chemicals, well stimulation chemicals and general utility chemicals which are widely used in exploration and production industry dedicated to surpassing customers' needs. These products have a long history of excellent performance in cost effective operations and compatibility with other additives in these fluids. We understand the risk associated with chemicals used in drilling fluids-related problems so we take responsibility of delivering drilling chemical products to the client's location as well as anticipating and planning for the performance of those products in the field. Our ultimate objective is to provide products of the highest integrity while affording our customers the most economically beneficial costs possible. This objective is accomplished through our procurement process and the utilization of our extensive network of chemical manufacturers and suppliers.

CAMP SERVICES

SWCO has vast experience in camp services, Catering and Facilities Management Services. We provide a complete camp solution in locations with specialization in life support services. Our main focus sectors are mining, government organizations, business & industry, oil & gas, education, remote military garrisons and construction. Our major fields of activity:

- » Camp Accommodation
- » Camp Logistics
- » Man power
- » Catering services
- » Laundry Services
- » Camp Construction
- » Camp Management
- » Cleaning Services
- » Pest Control Services
- » Camp Maintenance
- » Arranging Transport
- » Porto-cabin rentals for office and storage usage

OUR EXPERIENCES

Project Description & Scope of Work	Project Name	Country	Date Completed	Value (in US Dollars)
EPCC	Irrigation and Drainage Pumping Station	Iraq	04-May-2009	3,593,000.00
SUPPLY AND CONSTRUCTION	Material Supply and Construction	Iraq	16-Apr-2016	3,600,000.00
EPCC	Engineering, Procurement, Construction and Commission of	Iraq	20-January-2017	14,867,102.00
EPCC	EPCC for Water Pipeline from Musharrah Pump Station to BUT	Iraq	1-July-2019	12,500,000.00
SERVICES AGREEMENT	Acidizing, Coiled Tubing and Nitrogen Services	Iraq	1-June, 2019	5,500,000.00
EPCC	Diesel Tank Station Extension Project	Iraq	01-May-2020	4,500,000.00
EPCC	Sulfur Warehouse	Iraq	01-June-2021	12,288,000.00

CUSTOMERS CARE

We work with our clients as a team. Mutual respect provides the foundations for our success. We are proactive in finding solutions for our clients that best achieve their goals. Lasting relationships are the lifeblood of our business. We want the client to feel that our staffs are even more committed to the effort than their own staff. That's what distinguishes us, personal attention to our clients as individuals and caring about them.

In our company the most important thing is caring about our customers so we keep in touch with them by provided them best services. we choose our employees, equipment, materials and all services to achieve our success by introduce our tasks correctly and satisfied our customers.
